

RITI dot-Gov project
Pilot Project Telecentres – Country trip
04-08 November 2003

Country trip taken by
Jerker Torngren, Project Director
Bogdan Manolea, Legal Coordinator

Crossing the Danube is not always easy especially if the engine pulling the ferry is out of order and the travelers have to give a hand.... and the weather was not at its best this time...

“You see...here are the telephone and fax numbers of the centre, here on the leaflet...”

Let's see how to create an e-mail address.

This is how the Telecentres look like. People can use here the telephone, fax, computers and printer

Old and new in Frecatei

The new Telecentre is open. The pole next to the building, installed by the operator is a nice image for the people of Frecatei And they have a nice freshly painted door, have they not ?

Although the solution of the operator is not yet implemented in Rebricea, the PBX equipment in the Telecentre is already used to connect seven telephone terminals
